Summary

I am a student at Guru Nanak Dev University with a major in Computer Science and I'm ready to seek new opportunities. I have a passion for computer programming and information technology. I have used computer programming since I was in grade school. This passion has given me the ability to develop programs for a multitude of things, including robots, programming languages, and databases.

My other love is information technology. I have many plans to implement newer technologies in my life such as cloud computing and managed IT services.

I am open to learning new things and getting involved with new projects that can help me learn or apply all that I have learned throughout my university career.

I am a Web Developer with almost two years of experience working in the field of Web. I have worked on projects involving the development and implementation of websites for non-profit organisations as well as public schools.

Web Developer | Java Developer | C C++ Developer | PHP Programmer | Wordpress | Python | MySQL
